

A. Food Miles Index: Average Distance for Fresh Food Shipments

Weighted mean routed distance (miles) for SCTG 03–07 shipments to each metro, 2017 CFS

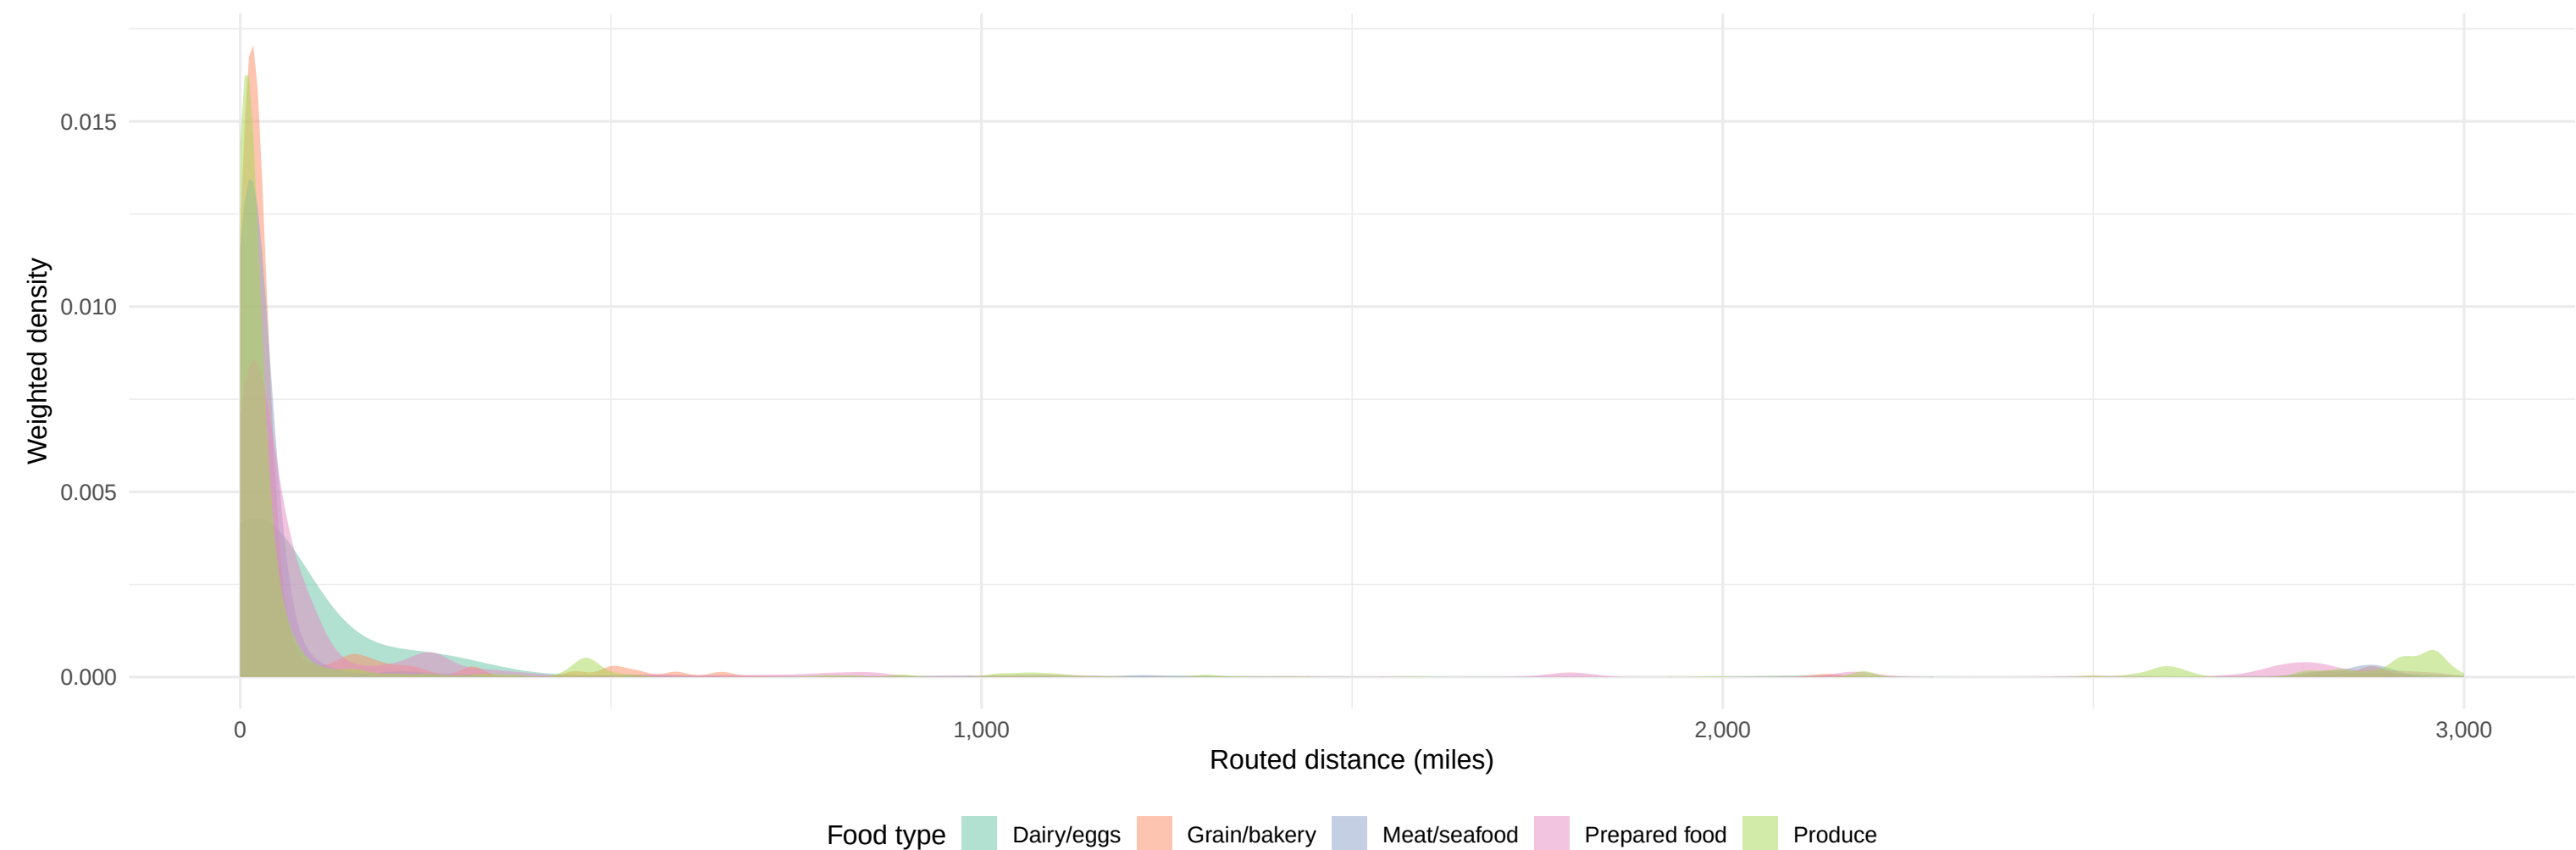

D. Carbon Intensity: CO2 per Ton of Fresh Food Delivered

Weighted CO2 (kg) per ton of food, using EPA emission factors by transport mode

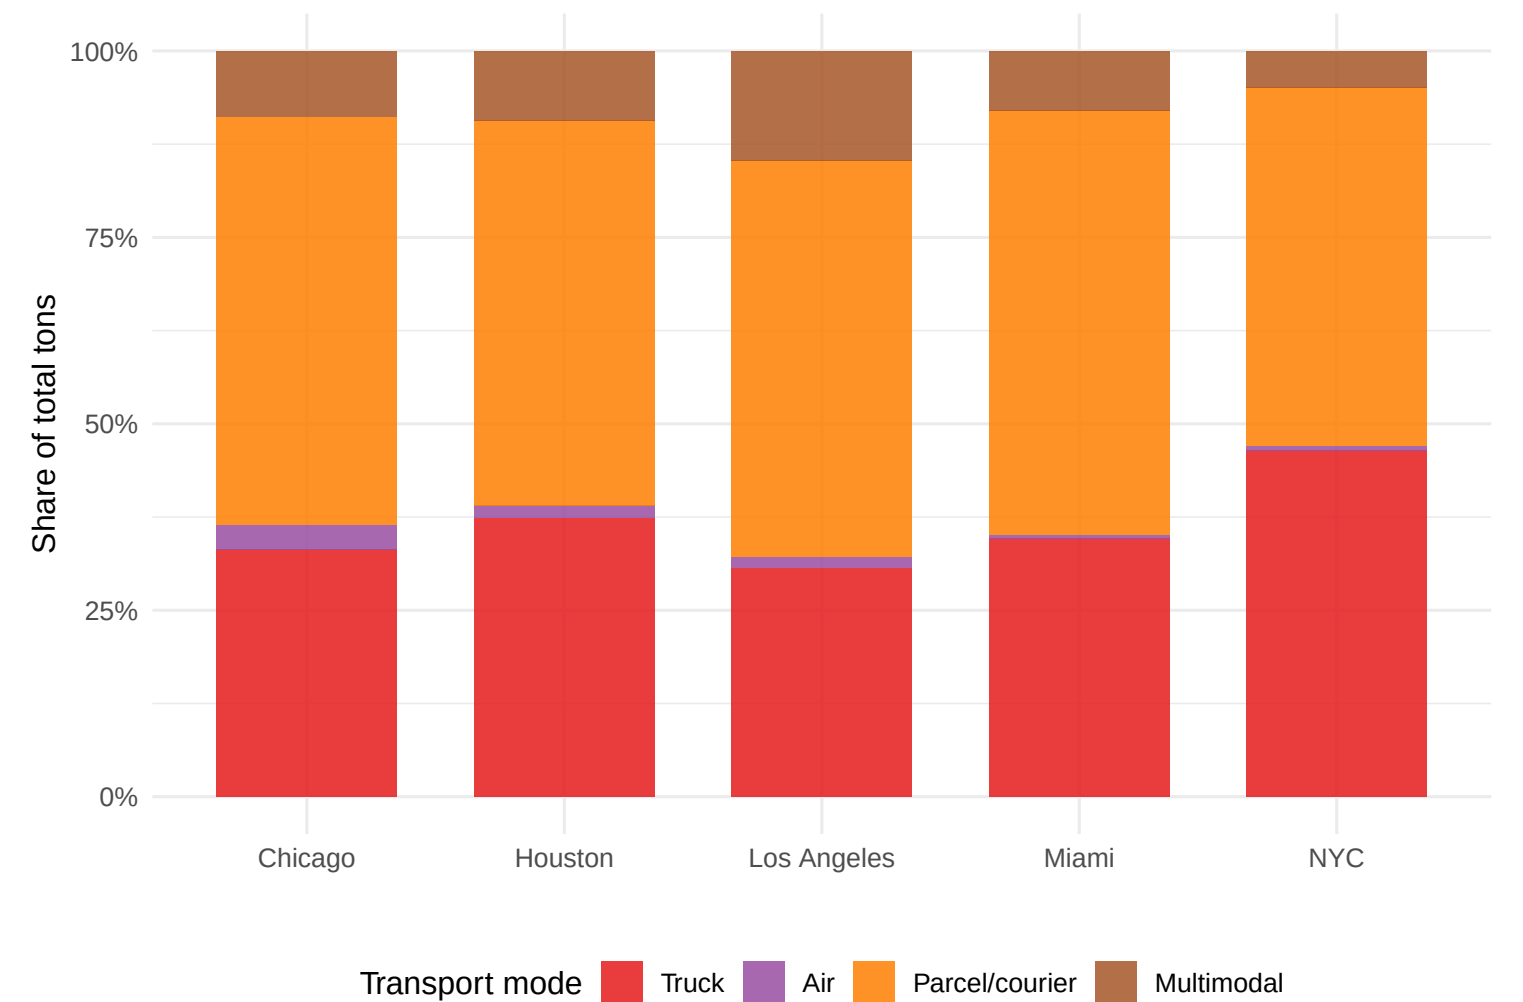

B. Where Does NYC's Food Come From? Distance Distribution by Commodity

Weighted density of shipment distances to NYC metro (DEST_MA=408), 2017 CFS

C. Modal Share: How Fresh Food Reaches Each Metro

Proportion of weighted tons by transport mode, SCTG 03–07, 2017 CFS

E. NYC: Mode Choice Matters More Than Distance

Air carries a tiny share of tonnage but a disproportionate share of CO2. Truck dominates both volume and emissions
