

CFS Value Analysis & Geographic Food Map

Commodity Flow Survey 2017. SCTG 03–07. All estimates design-weighted. n = 108,207 food shipments.

A. Value Density: How Much Is Each Ton–Mile of Food Worth?

Weighted total value / total ton–miles by commodity. Higher = more economic value per unit of transport effort. Meat & seafood is the most valuable per ton–mile; grain is the cheapest bulk commodity.

B. NYC's Food Supply Map: Origin States by Tonnage Share

Weighted share of fresh food tonnage shipped to NYC metro area. NY (34%), NJ (27%), PA (15%) dominate. Two-thirds of NYC's food originates outside New York state.
